

SAINABOU CAMARA

CYBERSECURITY ANALYST • PYTHON DEVELOPER • SOFTWARE DEVELOPER • TECH SUPPORT

Email: Sainabou144@gmail.com | GitHub: <https://github.com/Yasai44> | Portfolio: <https://yasai44.github.io> |

LinkedIn: <https://linkedin.com/in/sainabou-camara-8630b1255>

SUMMARY

Entry-level technologist with hands-on experience building Python tools, backend systems, and practical diagnostic utilities. I learn by creating real projects from supply-chain scanners to booking systems. I focus on writing clean code, improving system reliability, and strengthening my technical fundamentals across software and security.

TECHNICAL SKILLS

Languages & Frameworks: Python, C#, Flask, Node.js, TypeScript, Express, Flutter

Security: SIEM basics, log analysis, vulnerability scanning, system auditing, incident response fundamentals

Networking: pfSense, routing, firewalling, TCP/IP fundamentals, DNS, HTTP/HTTPS, Linux system operations

Scripting & Automation: Bash, PowerShell, Python automation

Tools & Technologies: SQLite, Prisma ORM, JWT Auth, Linux, JSON/CSV/HTML reporting

Core Competencies: Secure coding, dependency analysis, backend development, troubleshooting, system diagnostics

PROJECTS

Chain Scan – Python Supply Chain Security Tool

A security analysis tool that detects supply-chain risks in Python dependencies.

- **Identified** risky dependency patterns by scanning both **PyPI packages and local Python files**, improving visibility into supply-chain exposure.
- **Analyzed** package metadata and code indicators to flag potential misconfigurations, outdated libraries, and insecure usage patterns.
- **Generated** structured **JSON and HTML risk reports**, making it easier to integrate findings into audits and documentation workflows.
- **Built** a Flask dashboard to **visualize risk levels and findings**, enabling faster review and prioritization of issues.

GitHub: <https://github.com/Yasai44/ChainScan>

System Health & Security Checker – Python + CustomTinker

A desktop tool for system diagnostics and security checks.

- **Collected** detailed system metrics (CPU, RAM, disk, OS info) to support performance and health monitoring.
- **Checked** firewall, antivirus, and update status to highlight basic security posture and misconfigurations.
- **Auto-generated JSON, CSV, and HTML reports**, enabling exportable logs for troubleshooting or security reviews.
- **Designed** a GUI workflow that reduces manual checks and centralizes system and security information in one tool.

GitHub: <https://github.com/Yasai44/system-health-checker>

SPA Booking Backend – Node.js, Express, TypeScript, Prisma

A modular backend booking system with authentication and admin workflows

- **Implemented** JWT authentication and **role-based access control**, separating admin and user permissions to protect sensitive operations.
- **Built** admin service management and booking flows, supporting end-to-end booking lifecycle from creation to confirmation.
- **Configured** Prisma ORM with migrations to maintain consistent, versioned database schemas across environments.
- **Achieved 80%+ test coverage** on core modules, increasing reliability and reducing regression risk during feature changes.

WORK EXPERIENCE

Cast Member – Landmark Cinemas, Waterloo, ON | January 2025 - Present

- **Troubleshoot** POS system issues during high-volume periods, reinforcing habits of structured problem-solving and incident handling
- **Followed** strict operational procedures with precision, mirroring compliance and security-minded behavior in technical environments.
- **Handled** customer issues quickly and professionally, building strong communication skills useful for support, ticketing, and cross-team collaboration
- **Practiced** reliability and time management by consistently meeting shift expectations and coordinating tasks under pressure with teammates.

EDUCATION

COMPUTER PROGRAMMING DIPLOMA – CONESTOGA COLLEGE (2026)

Focused on software development, databases, algorithms, and application programming. Strengthened debugging, problem-solving, and secure coding fundamentals through hands-on projects.

CERTIFICATIONS

ISC2 – CC Course Conclusion & Final Assessment

Issued: July 2026 Valid for 3 years

Learner ID: 32bb11a2-78c7-4bd2-8b74-cfd741927ce8
